

Australia

By: Ytali Dais & Bri Evangelist

Malcolm Turnbull is Australia's prime minister and has been since 2015. Turnbull came into power after he defeated Tony Abbott in a liberal leadership spill. Australia is under a parliamentary system but is currently a constitutional monarchy.

Australia is an open market. Industrialization, high technology, private enterprises, and natural resources make up their economy. Some advantages of being an open market is that it increased productivity, stimulated growth, and made the economy more flexible and dynamic.

Australia is located between the Indian Ocean and the South Pacific Ocean. Australia is the smallest continent but the sixth largest country in the world. Australia consists of low plateau with deserts but also fertile plain in the southeast. Right now their population is about 24,641,662 billion, since the 1970s the population seemed to increase due to natural birth but also due to overseas migration.

Australia culture is set towards where there are many different types of beliefs. You believe what you believe and nobody can't change how you feel about that. Australia's is like a western culture but they also celebrate events and holidays that are important to their country.

1972- commonwealth conciliation rules that women doing good the same job as men have the right to be paid the same.

- In 1973 the Vietnam War ended.
- In 1975 Australia sets a immigration law only allowing unskilled workers in.
- 1986 the Australian act makes Australia laws independent of the British parliament and legal system.
